Vetiver Grass

Vetiveria zizanioides L.

Roots bind strongly to soil

Slope stabilization (highway)

River bank stabilization

Pond stabilization

Features:

- Massive and deep root system
- Does not produce viable seeds and stolons — not a weed problem
- Not a host for pests and pathogens of any significance

Benefits:

- Stabilize hill slopes and river banks
- Control erosion and water pollution
- Reduce surface runoff and loss of top soil

Planting method

1

2

3

is our brand name of vetiver seedlings produced for convenient, easy handling and planting with minimal disturbance to the soil.
